Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

a. Group I is directed to claims 121-126 and 138-140, drawn to a passive safety mechanism having a blocking means with an additional function, classified in class 42, subclass 69.01.

i. If upon election of Group I, an additional election one of the distinct species below is required:

A= Slidable blocking means with an additional function.

B= Spring means with an additional functional.

b. Group II is directed to claims 127-137, drawn to a passive safety mechanism having a blocking means, classified in 42 , subclass 69.01

Distinctness

2. The inventions are distinct, each from the other because: Invention II is related as subcombinations disclosed as usable together in a single combination I. The subcombinations are distinct from each other if they are shown to be separately usable. In this instant case, in each of the inventions have a special technical feature not found in the other inventions.

3. Because these inventions are distinct for the reasons given above and the search required for group I is not required for group II, the restriction for examination purposes as indicated is proper.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no claims which are generic.
5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
